

RLT 7000 Automatic dispenser with liner recovery for single-sided and double-sided adhesive tapes

- DOUBLE-SIDED CUTTING DISPENSER
- ADHESIVE TAPE SET LENGTH DISPENSER
- LINER SEPARATOR SYSTEM
- ASSEMBLED IN FRANCE
- ADJUSTABLE BRAKES
- SUITABLE FOR ALL TYPES OF ADHESIVES
- DISPENSER WITH PROGRAMMABLE CUT LENGTHS
- SUITABLE FOR INDUSTRIAL PRODUCTION

The RLT7000 automatic dispenser is the result of an ingenious fusion of two pre-existing dispensers: the electric cutting machine RT7000, as well as the manual dispenser [AFB50TB](#). The DERFI teams designed a French-made duralumin support, to unite the two devices in a single distribution device, and this, with the aim of quickly dispensing set length strips of lined single-sided tape or double-sided tape. This device thus allows the operator to exclusively handle the double-sided adhesive tapes without having to handle liner separation, all while retaining the programming advantages of the RT7000 automatic dispenser. The user of this machine can then select up to 6 programmable values defining the different lengths of adhesive tape to be dispensed.

Caractéristiques techniques

PRODUCT REFERENCE	RLT 7000
REEL DIAMETER (mm)	76
MAX ROLL WIDTH (mm)	50
MAX DIAMETER OF ROLL (mm)	180
DIMENSIONS LxWxH (mm)	180x260x445
POWER SUPPLY(V/Hz)	230 / 50
WEIGHT (kg)	7,000
